Abstract & Presentation Overview

What is ALIGNMENT+?

ALIGNMENT+ is a **personalized** web-based physiotherapy rehabilitation platform that delivers customized exercise plans based on patient condition and severity. It bridges the gap between clinical guidance and home recovery with structured routines, progress tracking, and an intuitive interface.

Personalized

Condition and severity based customized plans.

Rehabilitation

Structured exercise routines for effective recovery.

Accessible

Accessible anytime, anywhere from home.

Q&A / Discussion

The Problem We Aim to Solve

Millions of people suffer from posture-related problems and musculoskeletal conditions due to poor lifestyle, lack of guidance, and inconsistent rehabilitation.

Key Challenges

Growing Health Issue

Posture-related problems and musculoskeletal disorders are rising rapidly.

Limited Access

Many people cannot afford or access regular physiotherapy sessions.

Lack of Personalization

General exercise plans do not address individual conditions and severity levels.

Low Adherence

Patients struggle to follow routines without tracking, reminders, and motivation.

Poor Progress Tracking

No centralized way to monitor improvement and adjust plans effectively.

Who is Affected?

Students & Professionals

Elderly Individuals

Manual Laborers

Fitness Enthusiasts

Post-Surgery Patients

ALIGNMENT+ addresses these challenges by delivering **personalized, accessible,** and **effective** rehabilitation solutions.

Our Proposed Solution

ALIGNMENT+ is a smart, personalized physiotherapy rehabilitation platform that adapts to each individual's needs and progress.

Our Goal:

To make effective physiotherapy accessible, engaging, and measurable for everyone, anytime, anywhere.

Better Outcomes

Improved Adherence

Time Efficient

Cost Effective

System Demo & Key Features

ALIGNMENT+ brings together assessment, personalized planning, guided exercises, and real-time tracking — all in one intuitive platform.

Dashboard

Get an overview of your progress, streaks, upcoming activities, and key insights.

Condition Selection

Choose your condition or area of concern for a tailored experience.

Assessment

AI-powered evaluation of posture, mobility, pain levels, and functional limitations.

Personalized Plan

Custom exercise plan designed specifically for your condition, goals, and severity.

Exercise Library

Access a wide range of expert-approved exercises with videos and instructions.

Guided Workouts

Step-by-step video guidance with posture corrections and safety tips.

Real-time Feedback

Get real-time posture feedback and movement analysis.

Progress Tracking

Track your progress, pain levels, and recovery metrics over time.

Smart Reminders

Timely reminders for exercises, posture breaks, and daily goals.

Reports & Insights

Detailed reports and visual insights to monitor improvement.

Goal Setting

Set your goals and stay motivated with milestone tracking.

Profile & History

Manage your profile and view your activity and plan history.

Everything You Need, All in One Place

From assessment to recovery – ALIGNMENT+ is your personal partner in better posture and stronger recovery.

What's Next for ALIGNMENT+

The roadmap extends the platform into a comprehensive, intelligent rehabilitation ecosystem.

AI Posture Detection

Real-time form correction using webcam-based movement analysis.

Progress Tracking

Visual recovery timelines and milestone celebrations.

Physiotherapist Dashboard

Clinician portal for remote monitoring and plan adjustments.

Mobile Application

Native iOS and Android apps for on-the-go rehabilitation.

Exercise Reminders

Scheduled push notifications to maintain daily adherence.

Cloud Sync

Seamless data synchronization across all devices.

Multi-Language Support

Localized interfaces for broader patient accessibility.

Conclusion

ALIGNMENT+ bridges the gap between clinical physiotherapy and home-based recovery — with precision, personalization, and ease.

6 Core Screens

A complete, end-to-end rehabilitation workflow.

1 Unified Platform

Condition selection, planning, and tracking in one place.

0 Specialized Hardware

Accessible on any standard desktop or tablet.

7+ Future Features

A clear roadmap toward an intelligent rehab ecosystem.

Key Takeaway: ALIGNMENT+ delivers structured, personalized physiotherapy guidance — making home rehabilitation as effective as clinic-based care.

Thank You..!

Questions now..?

We appreciate your time and attention. We welcome your feedback, questions, and suggestions as we continue to develop ALIGNMENT+.
